

JFA Meeting October 3rd, 2011 Minutes

14 members in attendance

- **Joel (pronounced Jo-el) Oropreza and Roger Reed visited the club. Roger has good experience in 1/10 rc cars, and is just getting started in rc aircraft. And Joel (who was also welcomed as a new member) is nearly solo-qualified on his Nexstar nitro.**
- **Show-and-tell: Jim showed his new Blade micro cp heli, which has no fancy case but he can actually fly it. And he also showed a neat little soft-sided electric tote that does it all. And Happy Gilmore gave a quick presentation on the practicality of upgrading or converting small, handheld electric appliances to lipo (or rechargeable) power.**
- **Field report: Trash is still an issue, and that plastic bucket full of sand is a snuffer for burning Lipos - please to note it is not a trash can. Members are once again reminded to take all their trash back home with them. In other field matters, we will be taking down the old 72 MHz. frequency board in favor of a smaller, simplified pad and frequency management board.**
- **Communications: There are two events in our area this coming Saturday: The WCRC Skyhawks in Simpsonville are having a charity fly-in to provide the children of Alexander elementary with much-needed school supplies. And the LARKS are**

having their annual float fly at Rawls point on Lake Murray, with a portion of the proceeds going to the Harvest Hope food bank.

- **The meeting was adjourned to Ds.**
